

DINIL DENNY

MERN STACK DEVELOPER

+91 9562655144 | dinildenny99@gmail.com | GitHub | LinkedIn

SUMMARY

MERN Stack Developer with hands-on experience building full-stack web applications using React.js, Node.js, Express.js, MongoDB, and TypeScript. Skilled in developing responsive UIs, RESTful APIs, authentication and role-based authorization, with experience in Redux Toolkit, RTK Query, Tailwind CSS, Repository Pattern and MVC architecture. Experienced in Agile-Scrum workflows, highly motivated to learn, adapt, and grow while contributing to real-world projects.

SKILLS

- **Programming Languages:** JavaScript, TypeScript
- **Frontend:** HTML5, CSS3, React.js, Bootstrap, Tailwind CSS, shadcn/ui, Redux Toolkit
- **Backend:** Node.js, Express.js, REST API Development, MVC Architecture, Repository Pattern Architecture
- **Database:** MongoDB
- **Tools & Platforms:** Git/GitHub, Figma, AWS (EC2), Postman, VS Code, Razorpay, Jira, Jenkins

PROFESSIONSL EXPERIENCE

MERN Stack Developer Trainee

July 2026 – Present

Softnotions Technologies Pvt. Ltd. — Technopark, Trivandrum

- Contribute to the development of a full-stack AI-powered MDT report generation platform for hematology and oncology cancer treatments.
- Develop responsive and reusable frontend interfaces using React.js, TypeScript, and modern UI development practices.
- Develop and integrate backend APIs using Node.js and Express.js, connecting frontend workflows with backend services.
- Work on hospital, doctor, and public user onboarding and subscription workflows, including registration forms, data persistence, role-based access control (RBAC), and permission management.
- Collaborate in an Agile Scrum environment, utilizing Jira for sprint planning and task management.
- Follow Git-based development workflows, deploying features after successful senior developer PR reviews and using Jenkins for frontend and backend project builds.

PROJECTS

Admin User Management System

GitHub

- Built a full-stack Admin/User Management application using MongoDB, Express.js, React, Node.js, and TypeScript.
- Implemented JWT authentication, Google OAuth login, OTP verification, password reset flow, and role-based access control (RBAC).
- Designed scalable backend architecture using Repository Pattern with Controller-Service-Repository structure.
- Developed responsive frontend UI using Tailwind CSS, shadcn/ui, Redux Toolkit, and RTK Query.
- Integrated Cloudinary for image storage and implemented admin features including add/edit/delete user management.

Lifeboat – Crowdfunding Platform (Ongoing)

GitHub

- Created complete UI/UX designs using Figma before implementation.
- Designing and developing a full-stack crowdfunding application using the MERN stack.
- Building reusable React components with responsive layouts and developing user-friendly interfaces for crowdfunding campaigns.
- Following modern component-based development practices and Repository Pattern architecture for scalable backend development.

UFO Cart – E-commerce Fashion Store

GitHub

- Designed and developed full-stack web features using React.js, Node.js, Express.js, and MongoDB.
- Implemented RESTful APIs, authentication, product management, and admin workflows.
- Improved performance by optimizing queries and restructuring routes using MVC architecture.
- Integrated Razorpay for secure online payments and Multer for multi-image uploads.
- Created admin dashboard visualizations using Chart.js.
- Managed server deployment on AWS EC2 with Nginx and PM2 for seamless management.

EDUCATION

MERN Stack Development

2023 – 2025

Prototype

B.Tech in Electrical and Electronics Engineering

2017 – 2021

St. Joseph's College of Engineering and Technology, Pala
